

Green Site: internationalmetallographicsociety.org
Certified by **IPOWER**

IPOWER Green Certificate

IPOWER certifies that internationalmetallographicsociety.org is powered by 100% wind energy. That means the servers, data centers and offices supporting internationalmetallographicsociety.org are powered by renewable energy.

How internationalmetallographicsociety.org Has Gone Green

Our company has purchased Renewable Energy Certificates (RECs) to offset our energy use, in an effort to reduce our impact on the environment. That means by hosting with IPOWER, internationalmetallographicsociety.org is powered by 100% wind energy.

Measuring the Environmental Impact

By hosting with IPOWER, internationalmetallographicsociety.org is helping our company prevent the release of 2,660 metric tons of carbon dioxide from entering the atmosphere each year. As a result, our company's energy efficiency is equivalent to planting approximately 2,390 acres of trees, not driving 6.1 million miles, or removing 510 cars from the road.

About IPOWER

IPOWER provides shared web hosting solutions for individuals and small to medium sized businesses looking for an affordable, reliable web hosting option. IPOWER offers various site builder tools, marketing services and SEO solutions.
